

ASTON MARTIN OF NEW ENGLAND

## VANQUISH SPORTS DYNAMICS

Aston Martin is pleased to announce a new optional Sports Dynamic package for the V12 Vanquish. Available starting on cars being built in May of 2004, the new package has been designed to appeal to customers seeking a more aggressive, tighter handling Vanquish, without losing the class-leading refinements that characterize the current car.

The new package features:

- Stronger, stiffer front upright and wheel bearing assemblies. These new units (pictured below right) along with changes in suspension geometry, provide crisper handling and improved steering response.

- Up-rated springs and shocks: lower by 5mm, revised spring/shock rates for sportier handling.

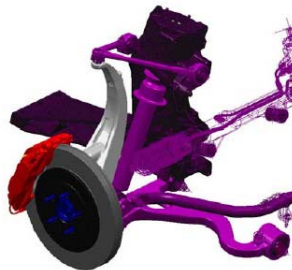

- Shorter steering arms, resulting in 20% quicker steering response.

- Brakes: 378 mm front discs. Increased swept area. 33% better cooling efficiency. Newly positioned 6-piston front calipers with 21% larger pad area. New competition-derived brake pad. Revised brake pedal ratio, improving pedal feel.

- Wheels: new 9-spoke light alloy 19" forged wheels - 28% lighter front / 30% lighter rear. Lower unsprung weight for crisper response.

For those of you interested in this package, please contact Pat Roussel at ext. 222 to discuss pricing and ordering options.

This package may also be offered as a dealer-fit option for pre-04' cars. Full details on these plans will be released when available, most likely post-May 2004.
